

Membership Information

The easiest way to join our club is to attend the next meeting or two for free, and if you wish to continue, complete the membership application and receive full benefits.

The annual fee of \$40.00 includes you and your immediate family. The enrolled member has full voting privileges.

Member of the
Association of Personal Computer User Groups

When and where does the club meet?

2nd Thursday of each month
7:00 to 9:30 PM throughout the year

Faith United Church
1778 Nash Road, Courtice

(On the north side of Nash Road, just east of the junction of Courtice Road & Nash Road)

Benefits of Club Membership

The Durham Personal Users' Club is a self-help group in Durham Region for PC users who are experienced or new to computing. Some use computers for work, others as a hobby.

The club, which formed in 1986, is a non-profit organization. Some members have been in the club since its founding days.

The club's goal is to help members understand how to use their computers

and to help them keep current with the rapidly changing technology and software.

Many members have joined to gather information about how to get started with this new hobby.

NEWSLETTER

The club's newsletter, "PC Monitor", is published monthly. Members receive it electronically and it is published on the club web site.

Our web site carries complete previous monthly newsletters. Some of the columns featured are the President's message, prize winners from the previous meeting, a report about the last guest presenter, interesting downloads, new software reviews and interesting news from different SIGs from time to time.

DOOR PRIZES

Guest speakers often donate door prizes. These and other prizes are drawn at the close of each meeting.

MEETINGS

We bring to members information about new hardware & software products and industry developments. Presentations & demonstrations by guest hardware or software vendors or by our own club members help accomplish our club goals.

Topics range from basic hardware issues (the computer or its peripherals), to methods and procedures for getting the best performance from software to warnings about potential problem areas.

SIGs (Special Interest Groups) Our SIGs allow members of like interest to delve into certain

aspects of computing. Currently, the club has the following operating SIGs... **Beginners, Linux, Photography.**

BUG SESSION

This popular feature at our monthly meetings is chaired by the club guru. This is an opportunity for members to ask for advice about hardware or software problems. Commonly many helpful suggestions are offered, often leading to a solution.

LIBRARY

Every month the club's librarian creates a review of public domain and shareware software that is published on the club's web site. The librarian also prepares brief monthly articles for the FYI section of the club's newsletter concerning new software or hardware and/or upgrades and computing trends.

FREE COMPUTER LITERATURE

Another benefit of the DPCUC meetings is the opportunity to pickup free computer related literature when it is available.

REFRESHMENTS

Coffee and pop are available at the meetings for a pick-me-up during the conversations with your friends during intermission. There is a nominal charge.
